Gates III, Chairman, Microsoft Corporation: "I need a ton of information to stay the leader in computer software, but I have super limited time. Which is precisely why I read The Wall Street Journal. The way The Journal's organized, I can access a lot of information, valuable information, in practically no time. A quick scan of 'What's New' on the front page tells me what stories I should read. And the stories give you the most news in the fewest words. There are some things I don't have any way of finding out except by reading The Journal. Like which big companies are committing to what hardware. Information so important it influences the way we deal with our customers today and plan marketing strategies for tomorrow. It's really simple. If you're going to be a key decision maker, you absolutely have to be kept up on The Wall Street Journal." Below the quote, it says 'THE WALL STREET JOURNAL. All the business news you need. When you need it.' At the bottom of the ad, there are links: '» via | » more celebrities...'
- Advertisement 2:** A color photo of a man sitting at a desk with a computer monitor and keyboard. The text above him says: "Microsoft Multiplan allows me to explore more alternatives in less time. At the bottom of the ad, there are links: '#. » via | buy on eBay | more computers and software...'
